A **High Tech** distribution company for
high standard people

DISCLAIMER ON LIMITATION OF LIABILITY

These internal working materials are exclusively intended for informative purposes

In particular, the enclosed information should not be considered as a financial, commercial, investment, legal or any other type of proposal or offer. This information should also not be taken as a call-to-action or an urge to utilize the described services. Any decisions on the use of these materials should be made independently.

Minting of Coins and Token

Through a so-called minting (technical process), via delivered hardware or hardware which is maintained and serviced for the user in the course of a so-called "In-house Minting", users have the opportunity to mint coins or tokens. From a legal point of view, all minted coins and tokens of the following projects are payment coins or tokens. No liability or guarantees can be assumed for the price development of these coins or tokens on crypto exchanges, as price developments of cryptocurrencies are dependent on multiple market influences.

Time Halving & Sales Halving

With a so-called time halving & sales halving, the total number of minted coins or tokens can differ from masternode to masternode (hardware/processor for minting coins or tokens). Basically, the later a masternode is activated for the minting process, the lower the total number of minted coins or tokens. Therefore, before you consider a possible purchase of a masternode, check whether the number of coins or tokens still to be minted by this is fair to your decision.

Cryptocurrency trading is inevitably linked with certain risks, is highly speculative, and may lead to partial or total losses in the prices of cryptocurrencies at your disposal.

We strongly recommend to make informed decisions on trading, investing, or exchanging cryptocurrencies, relying on professional consultations as needed. Make sure to verify the services offered by the companies indicated in these materials before installing, registering for, purchasing or generally using these products for trade and investment purposes.

Please note that the information contained in this presentation is subject to change, which means that important aspects of the project can be changed or abandoned at any time.

Staking

So-called staking promotions represent blockchain and crypto projects whose indicators allow a high probability of success. However, since these are third-party projects, SAFIR is not responsible for the respective project itself, nor does SAFIR have any influence on whether the respective project is successfully implemented or not.

Therefore, no guarantees or promises can be made. We therefore strongly recommend that you inform yourself independently and on your own responsibility before making any decision in this regard.

Forecast

Forecasts are based on previous developments. Therefore, these do not represent any promises or guarantees. Changing market conditions or unforeseeable events which are outside of the company's own degree of effectiveness can influence future developments to a small or large extent.

RISK ASSOCIATED WITH CRYPTOASSETS

Things to know before buying cryptoassets or related products and services

Extreme Price Fluctuations

Many cryptoassets suffer from sudden and extreme price fluctuations and are speculative in nature, as their price is often based solely on consumer demand (i.e.. there may be no asset backing the project or other tangible value).

You can lose a large amount of money or even all the money you have invested. Extreme price fluctuations also make many cryptoassets unsuitable as a store of value or as a medium of exchange or payment.

Misleading Information

Some cryptoassets and related products are advertised to the public in an aggressive manner, using marketing material and other information that may be unclear, incomplete, inaccurate or even deliberately misleading.

For example, social media advertising may be very brief and focus only on the potential gains and not on the high risks. You should also be wary of social media influencers who typically receive a financial incentive to market certain cryptoassets and related products and services, so their communications may be biased.

Fraud And Malicious Activity

There are numerous fake cryptoassets and scams whose sole purpose is to deprive you of your money through the use of various techniques, such as phishing.

Product complexity

Some products offering exposure to cryptoassets are very complex and sometimes have features that can increase the magnitude of losses if adverse price fluctuations occur. Given their complexity, these products are not suitable for many consumers.

Lack of Protection

Most cryptoassets, and the sale of related products or services, are not regulated in most jurisdictions. In these cases, you will not enjoy the rights and protections available to consumers of regulated financial services, such as complaint or redress mechanisms.

Market Manipulation, Lack of Price Transparency and Poor Liquidity

The pricing of cryptoassets and the execution of transactions on the platforms are often not transparent. In addition, the holding of certain cryptoassets is highly concentrated, which may affect prices or liquidity. Therefore, you may not get a fair price or deal when buying or selling cryptoassets, or you may not be able to sell your cryptoassets as quickly as you would like in the absence of a potential buyer. Market manipulation has been reported on multiple occasions.

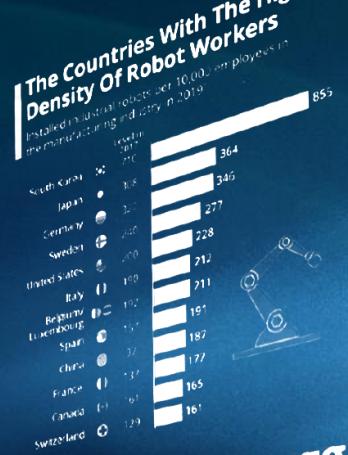

Cyber-attacks, Operational Risks and Security Issues

The distributed ledger technology that underpins cryptoassets carries specific risks. Several cryptoassets issuers and service providers, in particular crypto asset exchanges and e-wallet providers, have suffered cyber-attacks and serious operational problems. Many consumers have lost their cryptoassets or suffered losses due to such attacks and service disruptions or lost the private keys with which they access their assets.

The world we were prepared for no longer exists

Society is facing one of the biggest job losses in history, as well as one of the most important redistributions of wealth ever seen up to the so-called fourth in industrial revolution.

BUT- in times of greatest upheaval, unimagined new opportunities are also emerging.

Pandemic Causes Staggering Loss of Working Hours

NOMO App

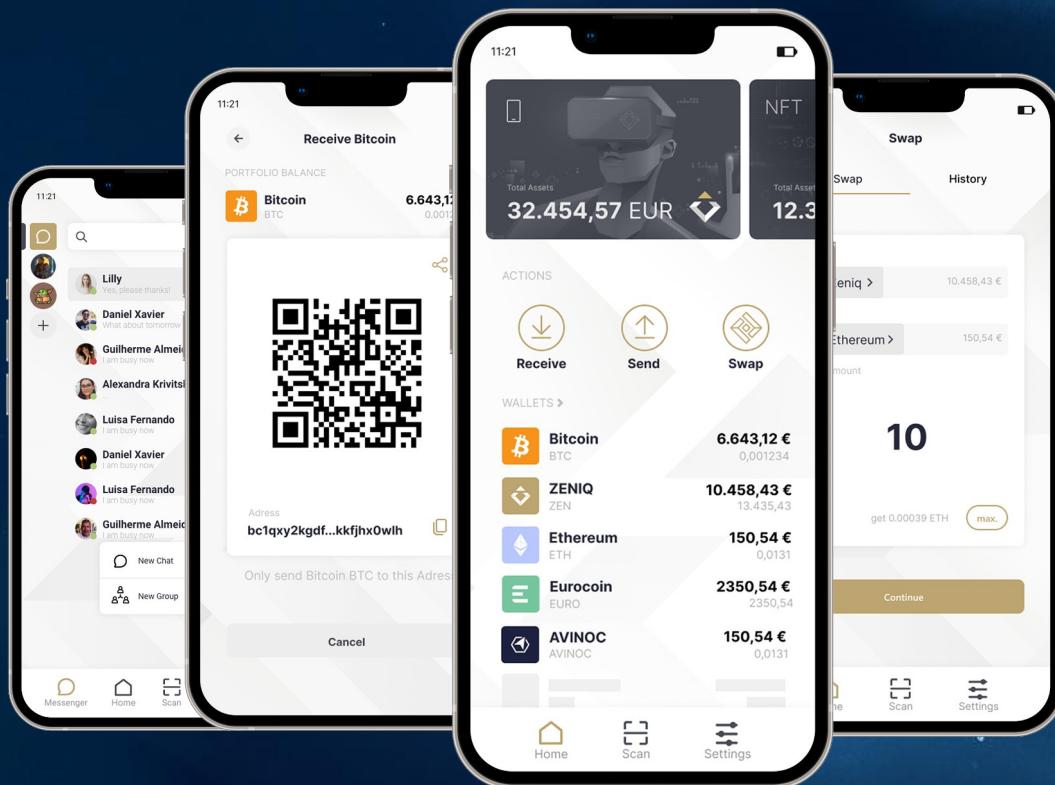

Powered by ZENIQ®

UNIQUE, EASY TO USE, MASS APPLICATION!

The technical foundation: the enormous advantages of the ZENIQ ecosystem, allow for functionalities and possibilities that other market participants cannot implement in this form. Not because they don't want to - but the technical substructure does not allow this.

App Features

- ◀ Capability of sending and receiving digital assets
- ◀ NFT and Staking Capability
- ◀ Debit card integration
- ◀ ZENIQ Hub integration
- ◀ Supporting biometric authentication (Fingerprint)
- ◀ Secure with support of recovery words
- ◀ *Self-custodial wallet - only the owner has the keys*
- ◀ **AND - there's more to come!**

Your smartphone, your secure wallet

Version: 12/2022, Typing errors, other errors or changes reserved.

New Feature NOMO Messenger

Chat functionalities:

- ◀ End-to-End encrypted

- ◀ Video and voice call capability
- ◀ Cryptocurrency send and receive possibilities

Note: Many of the listed features have already been activated. Others are still in preparation.

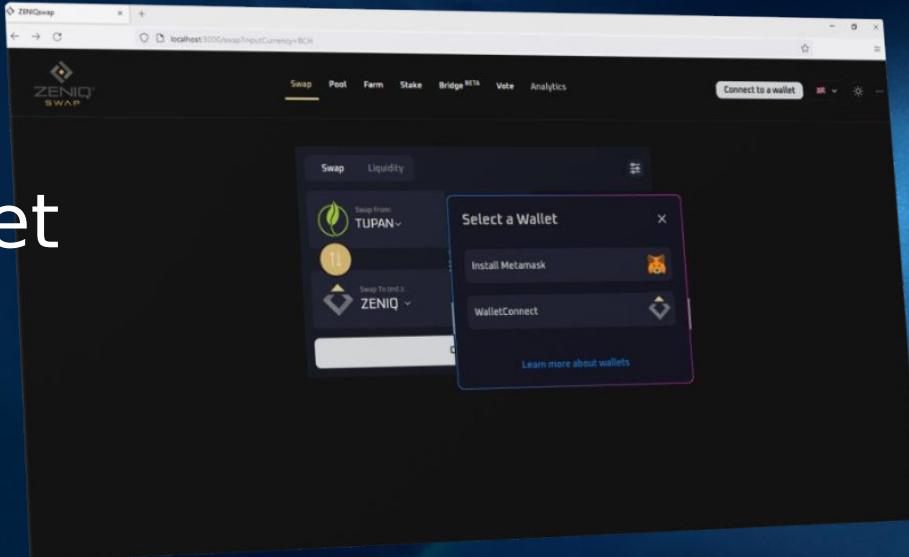

ZENIQ Swap

Powered by ZENIQ®

MASSIVE POTENTIAL! ABSOLUTELY UNRIVALLED!

- ▶ Decentralized Exchange
- ▶ Runs on the ZENIQ SMARTCHAIN
<https://smart.zeniq.net>
 - ▶ Over 15,000 transactions per second possible
 - ▶ Unique fee structure (unrivalled)
- ▶ With one (1) ZENIQ® Coin as a fee, around 160 swaps can be executed.
- ▶ With one (1) ZENIQ® Coin as a fee, approximately 5,000 ZENIQ Coin transactions can be executed
- ▶ With one (1) ZENIQ Coin as a fee, approximately 2,000 ZEN20 Token transactions can be conducted.

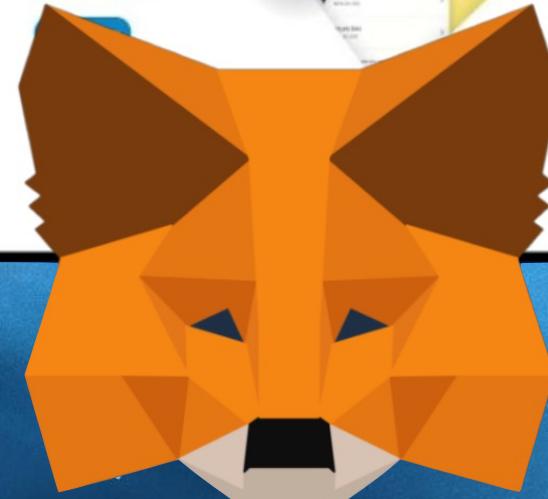

swap.zeniq.net

HOW TO USE THE SWAP?

Connect with Metamask Wallet

- ▶ 1. Create MetaMask Wallet (if not already done). For this purpose, the tutorial video "How to create your MetaMask Wallet" is available in the SAFIR Backoffice under the menu item "Support > Helpcenter".
- ▶ 2. Add the ZENIQ SmartChain to the MetaMask Wallet under "Networks > Add Network". You can see how this works here: <https://www.zeniq.dev/>
- ▶ 3. After that the MetaMask Wallet is connected to the ZENIQ Swap.

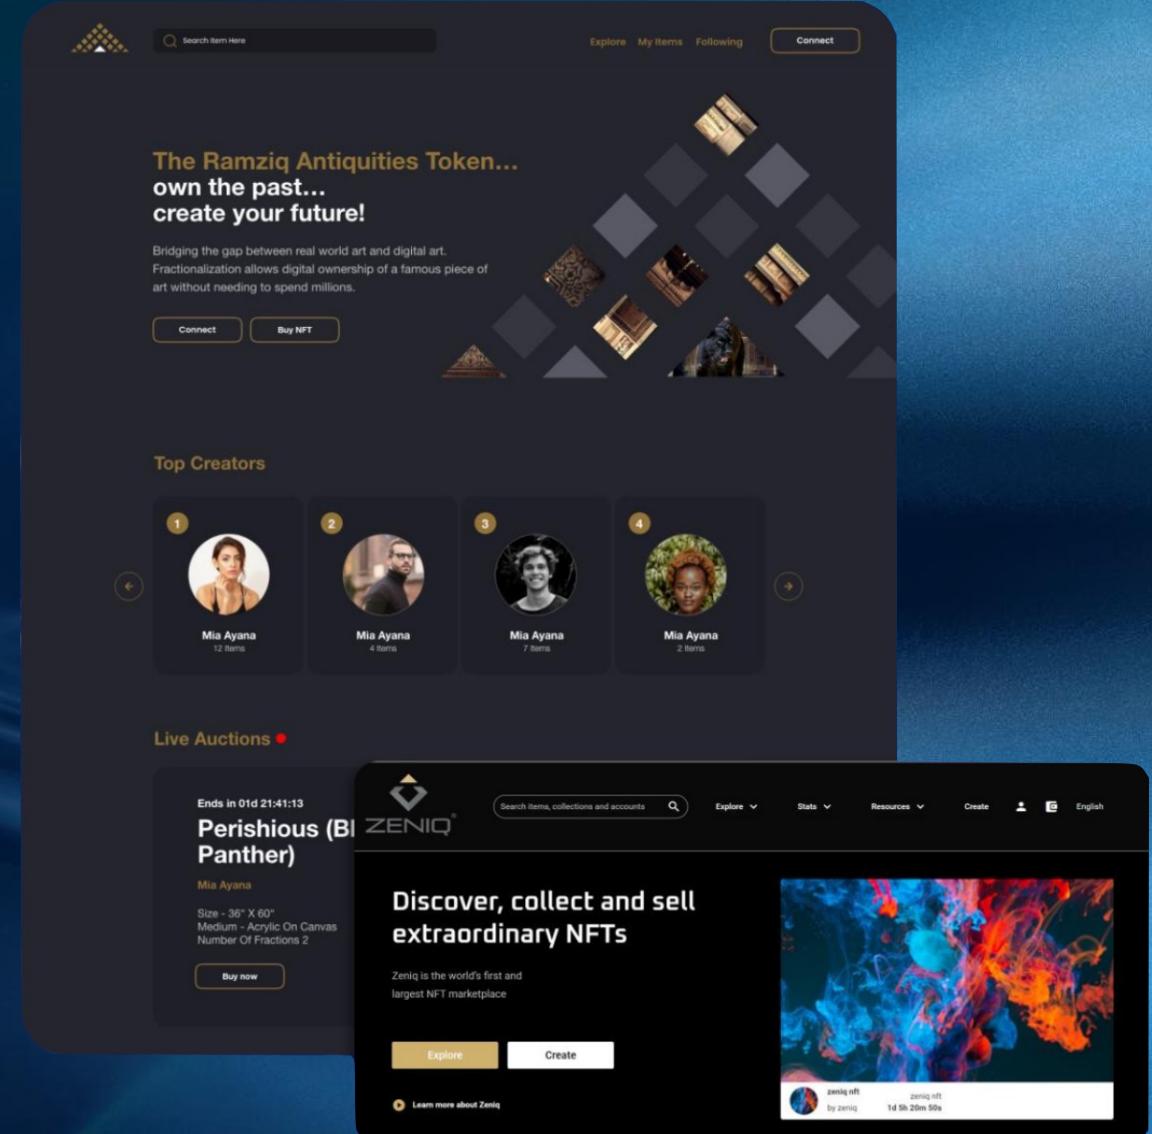

NFT Marketplace

UPCOMING DEVELOPMENTS

Specification:

- Capability of making, listing and selling NFTs
- Running on ZENIQ Smartchain
- Supporting ZEN-721 standard
- Multi languages (Arabic, English, German)
- User-friendly
- User Profile and gallery supported (similar to social media)
- RAMZIQ Antik NFT
- RAMZIQ NFT Marketplace

Asset accumulation through real projects and use-cases

Note: Each tokenization project implemented by ZENIQ influences the value development of the ZENIQ Coin.
** Calculation based on Brand equity in 2020

MULTI TRILLION MARKET TOKENIZATION

Reasons for tokenization

- ▶ Project financing
- ▶ Huge savings potential for companies (multi-billion annually worldwide)
- ▶ 100% transparency and time savings through blockchain technology

TOKENIZATION Market volume
FORECAST: US\$ 24 Trillion till 2027 worldwide!
(Source: World Economic Forum)

What can be tokenized?

- ▶ Real estate
- ▶ Solar plants, wind power etc.
- ▶ Art, paintings, antiques
- ▶ Patents, licenses, contracts for work and services
- ▶ Assets of raw materials and finances

BTC & ZENIQ®

COMPARISON between Mining & Minting

Mining

- Constant hardware upgrades
- Significant electricity consumption, insurance and space for the rigs
- No Smartchain, single-project mining
- 7 transactions per second (TPS)

Community Minting

- Optimized devices with add-on possibilities
- Very low electricity consumption
- Smartchain, unlimited project token minting capacity (access to other industries)
- More than 50,000 transactions per second (TPS)
- Accessibility to future new minting projects
- Multiple long-term minting and project results only with our community minting

*Mining and minting: two examples of how a cryptocurrency can be generated.

The CO₂ Certificate Market

Global Carbon Credit Market Value (US\$Bn) Analysis and Forecast. 2017 - 2027

Source: Coherent Market Insights

The global carbon credit market was valued at US\$ 211.5 Billion in 2019, and is expected to reach US\$ 2,407.8 Billion by 2027 at a CAGR of 30.7% between 2020 and 2027

Carbon credits create a monetary incentive for companies to reduce their carbon emissions.

Those that cannot easily reduce emissions can still operate, at a higher financial cost. Carbon credits are based on the "cap-and-trade" model that was used to reduce sulfur pollution in the 1990s.

Creator of TUPAN - the world's first (and only) "ESG Token" with financial backing by the ForestAu Green Investment Fund, duly US-SEC-regulated - and VISION Token - the world's first (and only) Financial Leverage Token.

NEW MOSES

Fish Export Project

Fully Integrated with nature, from creation to export.

The project aids more than 2,000 families. In addition to supplying the population with fish from the river, it also generates income from the exportation of fish, without cutting down a single tree.

Commodity

Social and environmental

Commodities like rice, soybeans, corn and meat from producers who *really* care about reducing carbon impact in atmosphere, as well as creating social and environmental impact in full compliance of UN 17-SDG.

TUPAN 300

Drone

Tupan 300 is a HS-VTOL (High Speed Vertical and Take Off Landing) unmanned aerial vehicle, designed to monitor areas, gather information, and it also provides surveillance.

It has been developed by Turbomachine in partnership with ForestAu Green for multi-mission purposes

AMAZONIA RIVER

Movie/documentary

It's a remake of the famous Jacques Cousteau's movie/documentary about the richness of fauna and flora of the Amazonas River, done 20 years ago.

Now, his granddaughter Celine Cousteau is going to update his work, more broadly, and using an 8k (or higher) technology.

Activities of the

AuGreen Fund

Current Minting Project:^{*} Tupan Community Token

Area preservation and regeneration

SOCIO-Environmental maintenance of the planet. The creation of the TUPAN sustainable minting community generates environmental, social, economic, and patrimonial resources.

Be part of the rise of the bioeconomy!

Environmental Credit

EC – Environmental Credit

It's similar to a CarbonCred (CO2e), but with real ESG impact in full compliance with UN 17-SDG.

EC - Environmental Credit is a kind of certification issued by TUPAN Certification Standards, over other known certifications in the market, that certifies that companies follow these standard rules and create true impact.

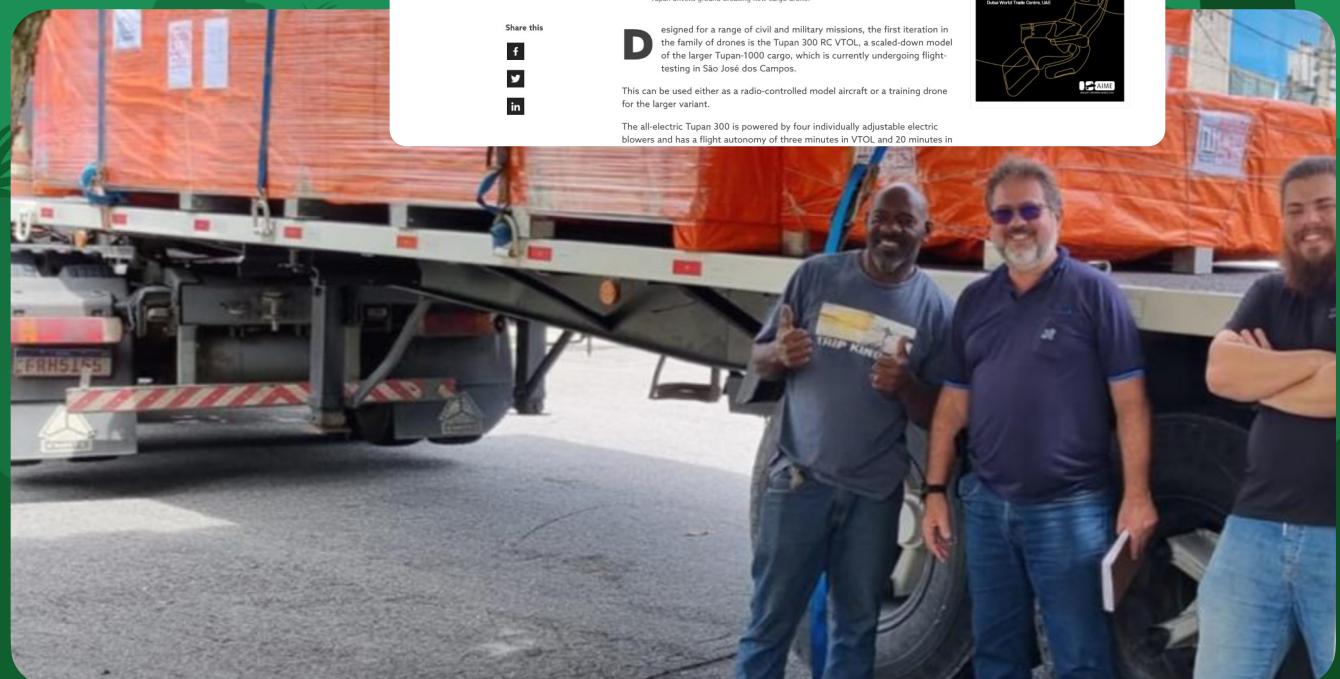

*All other projects listed on the slide are NOT part of the current TUPAN Minting Project. Only TUPAN Masternodes can be purchased via SAFIR. SAFIR does not sell or trade coins or tokens and do NOT conduct any financial services. The projects on the slide show different projects which are carried out or supported by TUPAN.

Mechanics for the price development of the TUPAN Community Token

AREA PRESERVATION AND REGENERATION

- ➔ Programs towards zero carbon
- ➔ Innovative sustainable products
- ➔ Socio-environmental projects
- ➔ Regenerative circular bioeconomy
- ➔ Impact investing

In addition to generating these carbon credits, the community participates indirectly in these impact investments by holding the TUPAN Community Tokens

Profits made from trading CO2 certificates are used to buy TUPAN tokens on the exchanges (from the market).

- ① The user buys the ZENIQ Hub with the TUPAN add-on and joins the TUPAN TCT Community
- ② Part of the profits from the sales of the ZENIQ Hub are applied on projects for preservation and regeneration of areas mapped by the ForestAU Green investment fund.
- ③ The fund will accept tokens generated by the community in exchange for CO2 Certificates
- ④ ForestAU invests in the purchase of land for carbon capture projects and issues carbon offset certificates that go back to the fund
- ⑤ The carbon offset certificates are tokenized and sold to the B2B market
- ⑥ ForestAU Green invests in companies and startups that work with projects for environmental compensation, carbon credits, environmental and financial technology, judicial and financial environmental recovery, regeneration and commodities

Halving overview

TUPAN Minting

PLEASE NOTE: The images are not to scale and are for illustrative purposes only.

Maximum supply, based on the maximum available number of TUPAN Masternodes of 1.5 million nodes, will be around 10 billion TUPAN tokens.

The entire TUPAN Minting process takes place on the ZENIQ Smartchain, which can be viewed transparently at any time at the web address:
<https://smart.zeniq.net>

Time Halving: from the activation/purchase date of the TUPAN Masternode, every year (for example: from the 10th of February to the next 10th of February) there will be 50% fewer minted TUPAN Tokens per day.

Sales Halving: with each purchased add-on TUPAN Masternode, the minting factor is reduced. As a point of reference, the minting factor is reduced by around 1% for every 2,000 masternodes, according to the algorithm.

Uni-Level (Up to 15 levels)

From the network point of view

Uni-Level / up to 15 levels

New accounts, or accounts that are not activated, are not considered the first level and are automatically skipped during remuneration.

As a result, there is no level disadvantage*.

All accounts are entitled to benefits from their direct buyers = first (1) level.

*Dynamic compression

Note: In case of multiple registrations, the last registered ID numbers / accounts will be deleted. Benefits obtained through multiple registrations will be forfeited.

Career Rank

Career Benefit

Sales are calculated cumulatively.

No obligation of monthly sales confirmations or
possible sales expiry

PERFORMANCE BENEFIT

The Performance Benefit is always calculated at the end of a calendar month and paid out to the qualifying Promoters no later than the 10th working day of the following month.

The calculation basis for the Performance Pool is the Total Effective Aggregate during one calendar month. 10% of the monthly Total Effective Aggregate is accumulated in the Performance Pool. This 10% is divided equally into three sub-pools.

If a Promoter doesn't reach a new Career Rank for at least 12 months after achieving their current one, that Promoter will fall out of the Performance Pool until they do reach a new Career Rank. However, if that Promoter reaches the 4% or 8% described above during a calendar month (even if they had dropped out of the pool), the Promoter will be eligible for the pool again during that specific month with the number of SharePoints associated to their current Career Rank.

Sub-pool 1: The EUR amount in sub-pool 1 gets divided by the sum of all SharePoints of all Promoters in the respective month. This represents the SharePoint value of each SharePoint in sub-pool 1.

Sub-pool 2: Promoters who were able to increase their performance by at least 4% (based on the total performance achieved (historical) at the end of the previous calendar month) in the respective month also qualify for sub-pool 2 with the amount of their achieved SharePoints. The EUR amount in sub-pool 2 is divided by the amount of SharePoints of Promoters who qualified for the sub-pool 2 in the respective month. This represents the SharePoint value of each SharePoint in sub-pool 2.

Sub-pool 3: Promoters who were able to increase their performance by at least 8% (based on the total performance achieved (historical) at the end of the previous calendar month) in the respective month also qualify for sub-pool 3 with the number of their achieved SharePoints. The EUR amount in sub-pool 3 is divided by the number of SharePoints of Promoters who qualified for the sub-pool 3 in the respective month. This represents the SharePoint value of each SharePoint in sub-pool 3.

Note: For a transparent overview, even during the current calendar month, all necessary parameters such as "how much is still missing in the performance to reach e.g. sub-pool 3 in the respective month?" are displayed in your SAFIR Backoffice.
